**WEBER**

The historical **Fabbrica Italiana Carburatori Weber** company was founded in Bologna in 1923 by Edoardo Weber, a young technician born in Turin from a Swiss father. It is an industrial company famous throughout the world for its production of carburetors with high technological and quality levels, widely used by the world's leading carmakers for mass-produced automobiles and by the best teams in motorsport for racing vehicles.

The carburetor with vaporizer for trucks and the “Econo-Super-Alimentatore” (Economy-Super-Supply) were the first products made by Weber: clever solutions to the operational and regularity problems of the engines in those years. The launch of the innovative carburetor, known as the “box” carburetor due to its shape, led to the Company's huge growth. This type of carburetor allowed vehicles to obtain performances otherwise unthinkable, with significantly lower consumption.

The success obtained by the Weber “twin barrel” carburetors made it possible to strike up collaboration relationships with the most prestigious carmakers, which started to fit the Weber carburetors on both mass-produced automobiles and racing cars. This is the case, for example, of Alfa Romeo, whose Racing Department was headed by Enzo Ferrari, or of Maserati, with which a relationship based on friendship was established also at the personal level, up to the long-lasting and winning bond with Ferrari, from 1947 until the present.

CARBURATORI  
**WEBER**

La storica **Fabbrica Italiana Carburatori Weber**, fondata nel 1923 a Bologna dal giovane tecnico torinese Edoardo Weber, è una realtà industriale famosa in tutto il mondo per la produzione di carburatori ad alto livello tecnologico e qualitativo, utilizzati largamente dai principali marchi automobilistici mondiali per le autovetture di serie e dai migliori team nel motorsport per le vetture da competizione.

Il carburatore con vaporizzatore per autocarri e l'“Econo-Super-Alimentatore” sono i primi prodotti della Weber: geniali soluzioni ai problemi di funzionamento e regolarità dei motori dell'epoca. Con il lancio dell'innovativo carburatore definito “a cassetta” per la sua forma, inizia il grande sviluppo dell'Azienda. Questo carburatore consentiva ai veicoli prestazioni altrimenti impensabili e consumi decisamente inferiori.

La fama conquistata dai carburatori “doppio corpo” Weber consente di allacciare stretti rapporti di collaborazione con le case automobilistiche più prestigiose, che adottano i carburatori Weber sia per le vetture di serie che per le vetture da corsa. È il caso ad esempio di Alfa Romeo, il cui reparto corse era diretto da Enzo Ferrari, o di Maserati, con cui si instaura un amichevole rapporto anche sul piano personale, fino al duraturo e vittorioso legame con Ferrari, dal 1947 in avanti.
